ABOUT ME

Passionate about web development, I am a self-taught developer specializing in JavaScript, React.js, and Node.js technologies. My strong understanding of fundamental programming principles and creative problem-solving skills has been enhanced through personal projects and online courses. Proficient in front-end development with React.js, I have crafted interactive and responsive user interfaces. On the back-end, my skills in Node.js have enabled me to build robust and scalable applications. My proactive approach to self-learning reflects my determination to stay abreast of the latest technological advancements. My resume not only showcases my technical skills but also demonstrates my ability to learn independently and apply that knowledge pragmatically in real-world projects.
